# Strange but TRUE Fixes to Errors and JVM Issues

Sponsored by no one, but assisted by

IBM Support and my Business Partners,  
fellow bloggers (many in this room) and  
other avenues which Google and the  
IBM Support Toolbar led me.

# Sametime Creates it's Own DNS?

**Well....**

# Sametime Resolution

DA had an external NAB which had old server docs in it for servers with old IP addresses.

HUH?!

# Undocumented Notes.ini Changes

Got BES? On the latest version of 4.1.6  
MR3 with Security update 2?

Did you know that it edits your Notes.ini and not  
just to say BES needs to get loaded in your Server  
task line?

# Java does WHAT with BES?

- HTTPDISABLEJVM=1 is BAD, rem it out
- May cause a performance hit, but at least BES and Traveler will run again.

- May cause a performance hit, but at least BES and Traveler will run again.

# Dead Server's Email

Of course they can't....can they?

**LDAP = ????**

**Last Domino Administrators Problem**

# DDM and not the one You Think

Domino Document Manager, R.I.P

Yes, people still use it!

Most admins don't realize you can not just edit the  
nsf/ntf files for Doc, it can kill your setup!
